

**Instructions:**

Print one colored copy. Using scissors, cut out the images. Mix them up and ask your child to first name them, and then organize the objects into groups or categories.

DO NOT NAME the categories. The idea is for your child to recognize the categories. If your child cannot name a category, then you can help by naming it. Challenge: Ask your child to find objects in your house that belong to each category. Take your time and be patient. Good luck! Enjoy!
